PROFESSIONAL SUMMARY

Digital Transformation and Enterprise Business Systems professional with 20+ years progressing from business analysis to specialist-level ownership of enterprise systems and fleet-wide transformation — including being retained through a company acquisition to lead the critical systems transition, then continuing to scale platform adoption and reporting automation across 70+ vessels. Delivered **USD 2.5M+** in cumulative savings and cost avoidance by driving system adoption to 90%, digitising procurement from manual quotations to 500+ daily transactions and building an in-house BI capability that replaced vendor-dependent reporting. Led cross-functional teams and up to 448 users through platform migrations and change management programmes, and provided functional leadership to a team of 10 Business Analysts while coordinating cross-functional delivery involving business users, technical teams, vendors, vessels and management.

CAREER HIGHLIGHTS

- Retained through the UASC – Hapag-Lloyd acquisition to safeguard AMOS operations across **32 vessels** with zero operational disruption; later scaled SERTICA digital workflows to **448+ vessel and shore users** across 73 vessels.
- Revitalised the under-adopted AMOS ERP platform through capability assessment, process redesign and change management, raising adoption to **~90%** and avoiding ~USD 1M in replacement costs.
- Digitised procurement through the AMOS–ShipServ integration, from 5–6 manual quotations to **500+ daily digital transactions** and USD 1M+ in cumulative savings.
- Built an in-house reporting capability: **150+ SQL-based AMOS reports** (USD 500K+ vendor spend avoided) and 50+ SERTICA KPI dashboards replacing manual Excel reporting.

CORE COMPETENCIES

Digital transformation · Enterprise business systems · Business analysis (CBAP) · Programme & project delivery (PMP) · ERP & fleet management systems · Systems integration · Requirements & UAT · Release governance · Change management · Vendor & stakeholder management · SQL reporting & KPI dashboards · Process automation · AI-assisted workflows

- Platforms & tools:** SERTICA · AMOS ERP · ShipServ TradeNet · SQL Server · Microsoft 365 · SharePoint · Jira · Confluence · VMware · Active Directory

WORK EXPERIENCE

Specialist — Fleet Management Software / Central Operations

Apr 2023 – Oct 2026

Hapag-Lloyd AG · Dubai, UAE

Scope: Fleet-wide enterprise systems ownership, digital transformation delivery, business process improvement and cross-functional stakeholder coordination

- Led safety digitalisation across **73 vessels** and mobile maintenance workflows across 40 vessels by standardising SERTICA processes, lifting adoption to 80–90% and cutting manual reporting effort by up to 90%.
- Transitioned **448+ vessel and shore users** onto standardised digital workflows through structured training and a SharePoint knowledge hub, embedding consistent practice fleet-wide.
- Delivered **50+ KPI dashboards** and automated reports via SQL Server and SERTICA's native reporting tool, replacing manual Excel processes and raising platform adoption to 80–90%.

Maritime IT Analyst — Fleet Management

Jun 2017 – Mar 2023

Hapag-Lloyd AG · Dubai, UAE

Retained through the UASC – Hapag-Lloyd acquisition to lead enterprise systems continuity and integration

- Safeguarded AMOS operations across **32 vessels** through the merger by coordinating enterprise systems integration and cross-functional migration of critical fleet applications, ensuring zero disruption to operations.
- Modernised infrastructure across 32 vessels — migrating legacy servers to VMware and standing up AMOS, Active Directory and file/email services — resolving 70–80% of critical production incidents and cutting post-migration downtime by ~90%.
- Established Jira-based incident management and a Confluence knowledge base, supporting SLA-based resolution of 30–40 monthly incidents while reducing reliance on subject-matter experts.

Senior Business Analyst — Fleet Management

Feb 2006 – Jun 2017

United Arab Shipping Company (UASC) · Dubai, UAE

Progressed through application support and business analysis responsibilities into a senior business analysis role within Fleet Management ·

Scope: Enterprise business systems leadership

- Revitalised the under-adopted AMOS ERP platform through enterprise-wide capability assessment, process redesign and change management, raising adoption to approximately 90% and avoiding **~USD 1M** in system replacement costs.
- Digitised procurement via the AMOS–ShipServ integration, scaling daily quotation capacity from 5–6 manual requests to **500+ digital transactions** and delivering USD 1M+ in cumulative savings.
- Built **150+ SQL-based reports** and dashboards using AMOS's native reporting tool, reducing development costs by 75%, avoiding USD 500K+ in vendor expenditure and enabling faster operational decisions.
- Re-engineered workflows across three operational departments, digitising manual activities and cutting administrative paperwork by 75%.
- Directed end-to-end AMOS enhancement delivery — product roadmap, vendor negotiation, requirements, UAT and release governance — while providing functional leadership to a team of **10 Business Analysts**.

SELECTED PROJECTS

Enterprise Fleet Safety Digitalisation Hapag-Lloyd · Jun 2022 – Jul 2026

Digitised safety jobs, drills and event reporting across the fleet — requirements, process redesign, UAT, phased rollout and training with Fleet Management, HSEQ, IT, vessels and vendors.

AMOS–ShipServ TradeNet Integration UASC · Dec 2014 – Dec 2015

Led functional and integration delivery of the RFQ-to-order-confirmation cycle: interface and field mapping, validation rules, exception handling, integration testing and UAT across AMOS, ShipServ and Spectec.

Haulage Contract Data Automation UASC · Dec 2015 – Feb 2016

Converted haulage business rules into a macro-enabled Excel solution generating validated, upload-ready contract records.

EDUCATION

Master of Computer Applications (MCA), Utkal University · 2002

Bachelor of Science (BSc), Physics, Sambalpur University · 1998

CERTIFICATIONS

Project Management Professional (PMP®) — Project Management Institute (PMI) Issued Dec 2020 · valid to Dec 2027 · ID 2906566

Certified Business Analysis Professional (CBAP®) — International Institute of Business Analysis (IIBA) Issued Jan 2021 · valid to Jan 2027 · ID 27452398

ITIL® Foundation — EXIN Issued Mar 2009 · ID 5748085.20561483

AI Development & Agentic AI (CAIDP · CAAIP) — LISRC In progress · expected Oct 2026

AI DEVELOPMENT & INDEPENDENT PROTOTYPES

Completing a three-month programme in AI development and agentic AI (CAIDP and CAAIP, LISRC), applied through independent, non-production prototypes built on synthetic data with AI-assisted development, prompt engineering and functional testing.

- **Maritime Operations AI Control Tower** — Live web app (React, TypeScript) — fleet overview, anomaly detection, predictive maintenance, voyage and fuel optimisation, safety monitoring and human-in-the-loop automation with approval gates.
- **Maritime Haulage Intelligence** — Live web app — the 2015 UASC haulage contract capability rebuilt with a deterministic rule engine, weight-slab generator and an AI layer kept clear of the calculation path.
- **More concepts** — GreenRoute AI, CareerConnectAI, Ledger 24K — mdxdxbhub2026.github.io/digital-ai-portfolio
