PROFESSIONAL SUMMARY

Digital Transformation and Enterprise Business Systems professional with 20+ years progressing from business analysis to specialist-level ownership of enterprise systems and fleet-wide transformation — including being retained through a company acquisition to lead the critical systems transition, then continuing to scale platform adoption and reporting automation across 70+ vessels. Delivered **USD 2.5M+** in cumulative savings and cost avoidance by driving system adoption to 90%, digitising procurement from manual quotations to 500+ daily transactions and building an in-house BI capability that replaced vendor-dependent reporting. Led cross-functional teams and up to 448 users through platform migrations and change management programmes, and provided functional leadership to a team of 10 Business Analysts while coordinating cross-functional delivery involving business users, technical teams, vendors, vessels and management.

CAREER HIGHLIGHTS

- Led enterprise systems and **448+ users** through a company acquisition and full platform migration (UASC → Hapag-Lloyd), maintaining zero disruption to fleet operations across 70+ vessels.
- Directed capability assessment, process redesign and change management that lifted enterprise platform adoption to **90%**, avoiding a USD 1M system replacement.
- Designed **150+ SQL-based reports** and 50+ KPI dashboards within AMOS's native reporting tool, cutting vendor reporting costs by USD 500K+ and reducing administrative effort by 75%.
- Provided functional leadership to a team of **10 Business Analysts** while coordinating cross-functional delivery involving business users, technical teams, vendors, vessels and management.

WORK EXPERIENCE

Two decades with one global container shipping group — United Arab Shipping Company, acquired by Hapag-Lloyd AG in 2017 — with scope expanding from business analysis to fleet-wide platform ownership.

Specialist — Fleet Management Software / Central Operations

Apr 2023 – Oct 2026

Hapag-Lloyd AG · Dubai, UAE

Scope: Fleet-wide enterprise systems ownership, digital transformation delivery, business process improvement and cross-functional stakeholder coordination

- Led safety digitalisation across **73 vessels** and mobile maintenance workflows across 40 vessels by standardising SERTICA processes, lifting adoption to 80–90% and cutting manual reporting and paperwork effort by up to 90%.
- Transitioned **448+ vessel and shore users** onto standardised digital workflows through structured training and a SharePoint knowledge hub, embedding consistent practice fleet-wide.
- Delivered **50+ KPI dashboards** and automated reports via SQL Server and SERTICA's native reporting tool, replacing manual Excel processes and increasing platform utilisation by 80%.

Maritime IT Analyst — Fleet Management

Jun 2017 – Mar 2023

Hapag-Lloyd AG · Dubai, UAE

Retained through the UASC – Hapag-Lloyd acquisition to lead enterprise systems continuity and integration

- Safeguarded AMOS operations across **32 vessels** through the merger by coordinating enterprise systems integration and cross-functional migration of critical fleet applications, ensuring zero disruption to operations.
- Modernised infrastructure across 32 vessels — migrating legacy servers to VMware and standing up AMOS, Active Directory and file/email services — resolving 70–80% of critical production incidents and cutting post-migration downtime by ~90%.
- Established Jira-based incident management and a Confluence knowledge base, supporting SLA-based resolution of 30–40 monthly incidents while reducing reliance on subject-matter experts.

Senior Business Analyst — Fleet Management

Feb 2006 – Jun 2017

United Arab Shipping Company (UASC) · Dubai, UAE

Promoted from Business Application Analyst · Scope: Enterprise business systems leadership

- Revitalised the under-adopted AMOS ERP platform through enterprise-wide capability assessment, process redesign and change management, increasing adoption by 90% and avoiding ~USD 1M in system replacement costs.
- Digitised procurement via the AMOS–ShipServ integration, scaling daily quotation capacity from 5–6 manual requests to **500+ digital transactions** and delivering USD 1M+ in cumulative savings.
- Built **150+ SQL-based reports** and dashboards using AMOS's native reporting tool, reducing development costs by 75%, avoiding USD 500K+ in vendor expenditure and enabling faster operational decisions.
- Re-engineered workflows across three operational departments, digitising manual activities and cutting administrative paperwork by 75%.
- Directed end-to-end AMOS enhancement delivery — product roadmap, vendor negotiation, requirements, UAT and release governance — while providing functional leadership to a team of **10 Business Analysts**.

EDUCATION

- **Master of Computer Applications (MCA)**, Utkal University · 2002
- **Bachelor of Science (BSc), Physics**, Sambalpur University · 1998

CERTIFICATIONS

- **Project Management Professional (PMP®)** — Project Management Institute (PMI) Issued Dec 2020 · valid to Dec 2027 · ID 2906566
- **Certified Business Analysis Professional (CBAP®)** — International Institute of Business Analysis (IIBA) Issued Jan 2021 · valid to Jan 2027 · ID 27452398
- **ITIL® Foundation** — EXIN Issued Mar 2009 · ID 5748085.20561483
- **AI Development & Agentic AI (CAIDP · CAAIP)** — LISRC In progress · expected Oct 2026

CORE EXPERTISE

- **Digital Transformation:** Capability assessment · Business process redesign · Change management · Product roadmaps
- **Enterprise Platforms:** SERTICA · AMOS ERP · ShipServ · Microsoft 365 · SharePoint
- **Delivery & Governance:** Stakeholder management · Vendor management · UAT · Release governance · Jira · Confluence
- **Data & Infrastructure:** SQL Server · SQL reporting · KPI dashboards · VMware · Active Directory

AI DEVELOPMENT & INDEPENDENT PROTOTYPES

Completing a three-month programme in AI development and agentic AI (CAIDP and CAAIP, LISRC), supported by independent, non-production prototypes built with AI-assisted development, prompt engineering and functional testing: a Maritime AI Control Tower (anomaly detection, predictive maintenance and voyage optimisation), GreenRoute AI (sustainable mobility decision support), CareerConnectAI (CV analysis and opportunity matching), Ledger 24K (personal finance and wealth analytics), and two digital experience concepts. mdxdxbhub2026.github.io/digital-ai-portfolio
